SAVUTE UNDER CANVAS

Chobe National Park

BOTSWANA

Savute, a remote and wild corner of Chobe National Park, stretches from the park's northern boundaries to the Linyanti River. The area's main feature is the mysterious Savute Channel, which flows and dries up seemingly unrelated to the rainfall. Dry and arid for almost 30 years, animals in the area were sustained by artificial waterholes. With the Savute Channel flowing again in recent years, the region has undergone a startling transformation, reverting to its natural lush and marshy state. Large numbers of wildlife have been attracted to this rejuvenated wilderness haven.

Sizable numbers of elephant bulls are invariably present. During the dry years, when prey was hard to find, many of Savute's lion became notorious for hunting elephant. With the recent transformation of the region, prey has become more abundant and the large lion prides have split up into smaller family groups, allowing a greater variety of predators

to flourish in the area. Savute is also a famous battleground for lion and spotted hyena. With grazing now plentiful, the area is also popular with zebra, wildebeest, buffalo, giraffe, tsessebe and kudu.

The semi-mobile tented camps of **&Beyond** Savute Under Canvas are carefully positioned at exclusive wilderness campsites in the expansive Savute corner of Chobe National Park, offering exceptional game viewing opportunities. Booked on a nightly basis, each of the five comfortable tents has a double bed, as well as an ensuite bathroom, separate w.c and steaming hot bucket shower, with water delivered on request. The guest areas comprise comfortable tents for dining, meeting for a pre-dinner drink or just whiling the time away between game drives. Welcoming camp staff serve delicious meals cooked over the glowing coals.
